#### **Notes to Editors**

Cove Energy is an AIM quoted E&P company with a strategy to identify and acquire oil and gas assets in the early phase of the upstream life-cycle and mature them into marketable opportunities for the medium and larger oil and utility companies.

The Company's initial focus is on Africa and the Mediterranean. Current operations in Mozambique include the Rovuma Onshore Area where Cove holds a 10% interest in the EPCC and an 8.5% interest in the EPCC covering Rovuma Offshore Area 1. A planned six well programme on Rovuma Offshore Area 1 (which includes the Windjammer discovery), to be executed in accordance with the revised conditions of the EPCC, commenced in December 2009 and is now drilling the third well, Ironclad.

Anadarko Petroleum Corporation is the Operator of both Mozambique EPCCs.

Cove Energy also has a 16.38% interest in petroleum operations (other than exploration operations) and a 20.475% interest in exploration operations in the Tanzanian Mnazi Bay concession, including the Mnazi Bay Production Sharing Contract, which contains the Mnazi Bay and Msimbati gas fields. Maurel & Prom is the Operator of these assets.

Cove operates with a minimum level of staffing but with a larger experienced “virtual” skills-pool from where it can draw on relevant experience on a case-by-case basis. The Company intends to partner and joint venture with investors and associates who will support Cove Energy with commercial skills and influence in areas where the Company intends to grow its business.

Cove Energy has a strong management team with a wealth of experience in oil and gas operations. Michael Blaha, Executive Chairman and formerly Country Chairman for Royal Dutch Shell Group in Algeria, is a petroleum engineer with twenty-nine years industry experience, his entire career spent working at Shell. John Craven, Chief Executive Officer and formerly founder and, until March 2009, CEO of Petroceltic International plc, is a petroleum geologist with thirty five years experience in senior technical and commercial roles in upstream oil and gas exploration and production companies.
